

Concept™ SQL Lite

What is Concept™ SQL Lite?

Concept™ SQL Lite, FSI's comprehensive entry-level Computer Aided Facilities Management (CAFM) solution, includes full Computerised Maintenance Management Software (CMMS) functionality. Concept™ SQL Lite is designed as a single site solution for the smaller scale operation with limited user numbers.

A selected range of optional integrated modules are available with Concept™ SQL Lite. As your business grows, an easy, full scalability option is available to upgrade to FSI's Concept™ SQL and Concept™ 500 solutions.

Who uses Concept™ SQL Lite?

Concept™ SQL Lite is suitable for use by single-site and static-site buildings, and sites with a low volume helpdesk or single service-line delivery. Concept™ SQL Lite is available from standalone, up to five workstation user licences, integrated separately if required.

Concept™ SQL Lite functionality includes:

- Access to asset lifecycle management information.
- Asset condition and criticality management.
- Asset register and asset management.
- Buildings and locations register.
- Comprehensive task auditing through event feature.
- Concept™ reports for ad hoc report writing.
- Customer satisfaction forms.

- Fast sign off and engineer's timesheet.
- Financial control.
- Graphical drag and drop planned preventative maintenance (PPM) planner, with resource utilisation and optimisation.
- Helpdesk/call logging.
- Labour operational planning system.
- Other works tasks.
- Planned maintenance register.
- Resource and skills register.
- Security and access level control.
- Standard management reports and statistics.
- Task management and control.
- Work permits.

Concept™ SQL Lite features and benefits include:

- Seamless scalability to other products in the Concept™ range as your business changes: no re-implementation necessary.
- Inclusive relational database: no further IT costs incurred.
- Database which can be run from desktop or workstation, or be server based: complete flexibility of product.
- Ease of deployment: no need to purchase specialised hardware.
- Ease of use: a user friendly system which will make operators feel comfortable and confident to use Concept™ to its full potential.
- Easy installation: minimal disruption to day-to-day function.

Let us help change your world.
