

# Qubi

## What is Qubi?

Qubi from QED Advanced Systems Limited is an easy-to-use interactive light cube for hot desk bookings, linked to Concept Evolution™.

Qubi provides clear 360° visibility of workspace status using simple red and green LEDs. Users can validate pre-booked desk and room bookings, book a desk or room for pre-defined periods of time, extend current bookings, and perform manual or automatic check-outs, with all information directly fed back to Concept Evolution™.

## Features include:

- Optional interactive modes for Check-in, Check-out, Extend and Instant Book are performed using RFID cards or tags.
- Simple card-driven interactive access.
- 'No-show' auto cancellation to automatically free up resource for others to use.

- End of booking reminders to ensure meetings finish on time.
- Overnight scheduled power save mode to minimise running costs.
- Information is automatically fed back into Concept Evolution™.

## Technical requirements:

- Connects to a standard LAN network with an RJ45 Power Over Ethernet (802.3af) connection – external DC power supply for non-POE use also available.
- Supports standard DHCP or static IP addressing using either HTTP or secure HTTPS protocols.
- Wireless available.
- Hard-coded application with no operating system, to remove virus or malware vulnerabilities.
- Connects via a QED ResourceXpress server to Concept Evolution™ or Microsoft Outlook Exchange.

ResourceXpress and Qubi are trademarks of QED Advanced Systems Limited.
